- Vehicle Intercom System
- Van Intercom System
- Bus Intercom System
- Coach Intercom System
- Taxi Intercom System
- Driver-Passenger Intercom System
- Kiosk Intercom System
- Counter Intercom System
- Toll Booth Intercom System

V2IS – 2 WAY INTERCOM

DESCRIPTION

The Nortek V2IS 2-Way Intercom System is designed to facilitate clear audio communication between a driver and passenger in vehicles with protective screens, such as taxis and buses. Manufactured in the UK, the system operates on a 10V – 30V DC supply, making it versatile for various passenger-carrying vehicles without additional converters.

In addition to automotive use, the V2IS can be adapted for commercial settings, including counters and kiosks, with a suitable 12V – 24V power supply. It features an additional control input that can be connected to remote PTT switches or activated by vehicle control signals, such as the handbrake.

The system also supports optional visual indicators to show microphone activity and offers various components, including an IP67 rated PTT & Mic Module & Loudspeaker for external applications.

NORTEK ELECTRONIC CIRCUITS LTD

Since its formation in 1978, Nortek Electronic Circuits Ltd has been designing and manufacturing high quality electronic products in the UK to exacting customer specifications, dependable quality, and leading designs. Nortek are a privately owned SME ideally based in a central UK location. All products meet E-type/CE/UKCA requirements and are designed and manufactured to meet our ISO9001 accreditation standards.

As well as designing and manufacturing our own range of products we can also carry out contract work to customers own designs and/or concepts. We develop and supply the highest quality electronics solutions supported by our long standing relationships with world leading innovative supply partners.

Above all, we support our customers by providing products and services of exceptional value which help them gain a competitive advantage in their markets.

SPECIFICATION:

- Operates from 10V – 30V DC, eliminating the need for additional converters
- Designed for clear communication through protective barriers like perspex
- Suitable for Taxi, Uber, Bus, Van, Coach, and various commercial applications
- Includes a control input for remote push-to-talk (PTT) switches or automatic activation
- Optional “TALK” indicator lamps for visual feedback
- Push-to-Talk switches, speakers, and microphones available as components or as a pre-wired module
- IP67 Rated PTT & Mic Module & Loudspeaker available for external applications (e.g., refuse collection vehicles)
